Introduction to Blockchain for  
Financial Services

Blockchain, Cryptoassets, and  
Decentralized Finance

Blockchain Transformations of  
Financial Services

Blockchain in Financial Services:  
Strategic Action Plan

05/10/2020

**DALAL HARSH**

has successfully completed the online, non-credit Specialization

# Blockchain Revolution in Financial Services

This four-course specialization introduces learners to the world of blockchain technology for financial services—including what blockchain is, how it works, and why it is revolutionary. Students learn about various categories of cryptoassets and the ways they can be transacted on a blockchain. They learn how blockchain is transforming the economy and society at large—redefining workflows, global payments, and prosperity. As an outcome of this specialization, students produce a Strategic Action Plan wherein they identify and evaluate a promising application of blockchain technology within the financial services industry.
